

# MEGANATHAN PALANISAMY

Senior Full-Stack Developer | React.js, Node.js, TypeScript

meganathankpm220@gmail.com | +91 9965422435 | Siruvalur, Gobichettipalayam, Erode, Tamil Nadu - 630954 | [linkedin.com/in/meganathantech-2k](https://www.linkedin.com/in/meganathantech-2k)

---

## SUMMARY

Senior Full Stack Developer with 4+ years of experience architecting and shipping scalable, multi-tenant web applications — from system design through production deployment. Leads full-stack ownership at Teckollab (UK, Remote), architecting Coheart, a multi-tenant LMS serving n number of organizations, with expertise spanning Frontend (React.js, Next.js, TypeScript, Redux — SSR/SSG, SEO), Backend (Node.js, Express.js, Prisma ORM, PostgreSQL, Redis), and Architecture (multi-tenant SaaS design, tenant isolation, CI/CD). Previously spent 3 years at App Innovation Technologies architecting MERN-stack solutions, boosting system performance by 25% and mentoring junior developers to 100% on-time sprint delivery.

---

## WORK EXPERIENCE

### Full Stack Developer

April 2025 – Sep 2026 (1 yr 6 mo)

Teckollab | Swindon, UK (Remote)

Integrations & Tools: Coheart (Multi-Tenant LMS), MUX, Zoom API, Ayrshare, GitHub Actions, Azure App Service.

- Architect and develop Coheart, a multi-tenant, cohort-based Learning Management System, using React/TypeScript and Node.js/Express/Prisma.
- Design multi-tenant PostgreSQL data architecture, defining tenant-isolation patterns for multiple organizations on shared infrastructure.
- Establish frontend architecture standards and modular backend service design to keep the codebase scalable.
- Implement SSR/SSG in Next.js with SEO optimization to improve search visibility and load performance.
- Integrated core third-party APIs — including MUX, Zoom, and Ayrshare — to power media streaming, real-time video, and automated social publishing features.
- Executed a complex security refactoring for ANI within an enterprise .NET project, rapidly analyzing legacy codebases to modernize system architecture and enforce enterprise security standards.
- Streamlined end-to-end delivery pipelines using GitHub Actions and automated Prisma database migrations, optimizing CI/CD workflows and reducing deployment overhead.
- Deliver features end-to-end — architecture through deployment on Azure App Service.
- Integrated GitHub Copilot and Claude into the software development lifecycle for AI-assisted code generation, code completion, refactoring, debugging, and code reviews, reducing repetitive development effort by 50% and accelerating delivery across the engineering team.

### Web Developer

April 2022 - April 2025 (3 yr 1 mo)

App Innovation Technologies | Coimbatore, India

- Gathered and analyzed complex client requirements, architecting solution modules aligned with project objectives and business goals.
- Built reusable, modular components while enforcing strict code quality standards, continuously evaluating emerging technologies to deliver tailored client solutions.
- Refactored React.js components and state management patterns across MERN-stack applications, boosting overall system performance and load speeds by up to 25%.
- Built Redis caching layers and asynchronous queue processing workflows to reduce database query latency and maintain stability under heavy traffic.
- Engineered enterprise MarTech solutions by integrating CampaignMonitor for automated email marketing alongside Meta/Facebook, WhatsApp Business, MagicInfo, and LG Digital Signage APIs to streamline multi-channel customer engagement.
- Automated deployment workflows using GitHub Actions CI/CD pipelines, eliminating manual deployment overhead and enforcing automated quality checks.
- Mentored 2–3 junior developers through code reviews and pair programming, setting repository standards and achieving 100% on-time Agile sprint delivery, while conducting thorough evaluations for code correctness, structure, and cross-platform compatibility.

## PROJECTS

---

### Coheart.io

Built and scaled core features of Coheart, a multi-tenant Learning Management Platform, covering programme management, scheduling, attendance, analytics, and communication. Associated with Teckollab.

- Developed full-stack features end-to-end using React.js, TypeScript, Node.js, and PostgreSQL for a multi-tenant SaaS platform.
- Designed scalable database architecture and APIs supporting organisations, programmes, cohorts, and learners.
- Built analytics dashboards providing teams with real-time visibility into programme and learner performance.
- Integrated third-party platforms, including video conferencing and automation tools, to streamline workflows.
- Improved application performance, reliability, and user experience through continuous debugging and optimization.
- Owned features across the full SDLC, from requirements analysis and implementation to deployment and production support.

**Tech Stack:** React.js | TypeScript | Node.js | Express.js | PostgreSQL | Prisma | REST APIs | Tailwind CSS | Azure | Git

### Culture Labs – E-Learning & Employee Engagement Platform

Built and enhanced core features of Culture Labs, an e-learning platform focused on course management, assessments, learner progress, and analytics. Associated with Teckollab.

- Developed full-stack features using React.js, TypeScript, Node.js, and PostgreSQL for a learning management platform.
- Built course, quiz, and assessment workflows supporting content delivery and learner tracking.
- Built analytics dashboards providing visibility into learner engagement and course performance.
- Integrated Mux for secure video delivery and protected streaming of online learning content.
- Improved application performance, reliability, and user experience through continuous debugging and optimization.
- Worked across the full SDLC, from requirements analysis and development to deployment and production support.

**Tech Stack:** React.js | TypeScript | Node.js | Express.js | PostgreSQL | Prisma | REST APIs | Mux | Tailwind CSS | Azure | Git

### Footprints CDM

Worked on a retail analytics and customer data platform for shopping malls and retailers, focusing on application maintenance, feature enhancements, performance optimization, and production support. Associated with App Innovation Technologies.

- Maintained and enhanced applications using React.js, Node.js, Express.js, Laravel, MongoDB, and MySQL.
- Improved Retail Analytics, Campaign Management, Sales, and Digital Signage modules.
- Enhanced REST APIs, database workflows, and third-party integrations.
- Maintained integrations with Facebook Ads, Google Ads, and Email platforms.
- Troubleshooted frontend, backend, API, database, and production issues.
- Optimized application performance, reliability, and user experience.

**Tech:** React.js | Node.js | Express.js | MongoDB | MySQL | REST APIs | JavaScript | Git

### Stepzero.eco

Built and enhanced features for StepZero, a sustainability platform helping businesses assess practices and generate actionable improvement plans. Associated with Teckollab.

- Developed full-stack features end-to-end using React.js, Next.js, TypeScript, Node.js, and PostgreSQL.
- Built onboarding workflows to capture business profiles, sustainability goals, and current practices.
- Integrated OpenAI APIs to generate personalized sustainability recommendations and actionable checklists.
- Designed responsive, user-friendly interfaces using React.js and Tailwind CSS.
- Improved application performance, reliability, and user experience through continuous debugging and optimization.

**Tech Stack:** React.js | Next.js | TypeScript | Node.js | PostgreSQL | OpenAI API | Tailwind CSS | REST APIs | Azure | Git

## EDUCATION

---

### **Bachelor of Science (BS), Computer Science**

**2018 - 2021**

*Gobi Arts and Science College, Gobichettipalayam*

### **HSC, Computer Science — Grade: 68.33%**

**2016 - 2018**

*MPD Govt Hr Sec School*

### **SSLC — Grade: 86.8%**

**2014 - 2016**

*MPD Govt Hr Sec School*

## TECHNICAL SKILLS

---

**Frontend:** React.js, Next.js, TypeScript, Redux, SSR/SSG, SEO Optimization

**Backend:** Node.js, Express.js, Prisma ORM, PostgreSQL, MongoDB, Redis

**Architecture:** Multi-Tenant SaaS Design, RESTful APIs, Microservices, Tenant Isolation

**Third-Party Integrations:** MUX, Zoom API, Ayrshare, Meta/Facebook, WhatsApp Business, CampaignMonitor, MagicInfo, LG Digital Signage

**DevOps & CI/CD:** GitHub Actions, Automated Prisma Migrations, Azure App Service

**Automation Tools:** Make.com

**API Testing:** Postman

**Version Control:** Git, GitHub
